# Truth

*Truth* is a spellbinding fusion of song and choreography which uses real testimonies collected from all over the world. Some are brutal, some hilarious but all are presented in a fresh and exhilarating style that truly pushes the idea of what theatre could be. Composer Helen Chadwick joins forces with Olivier award winning Steven Hoggett to create this beautiful and thought-provoking song theatre show which explores the once-simple notion of Truth in our messy modern age of fake news.

*When truth threatened my life, I told a lie ...*
